©Labgroup Data Center Contern, Luxembourg

Labgroup's data center combines high-end infrastructure with dedicated services to host your IT systems in the most professional way. Our innovative on-demand architecture uses an open building-block approach which fully integrates power, cooling and environmental management within a rack optimized design. We build, deliver, maintain and monitor - you use it as a facility.

› **High-end Infrastructure:** Located at the heart of Europe, Luxembourg has positioned itself as a high-technology data hub combined with attractive and very stable business conditions. Our data centers provide low latency with multi-tier connectivity for unmatched reliability and performance.

› **Professional Service:** Our concept lets you install only what is required today, yet easily scalable to meet future demands. Combined with multilingual client services, Labgroup provides you with professional expertise to help you with your IT infrastructure needs.

Luxembourg - the data hub of Europe

High end technology hub:

> Low latency, at the heart of theinternet hubs of Europe: Amsterdam, London, Brussels, Frankfurt and Paris.
> Redundant high-capacity fiber optic.
> Ultra-high bandwidth
> First class Telco networks
> Ultra modern Tier-IV and Tier-III, high availability and state-of-the art infrastructure.

Attractive business place:

> Attractive IP and Tax Laws
> Skilled multilingual workforce
> Strong R&D environment
> Political stability
> Central location in Europe
